# A4 10up Voiding Wristbands

## 36 micron Laser Guaranteed Polyester Wristbands

A colourful range of wristbands supplied in A4 format which can be personalised using a standard laser printer. Designed for maximum flexibility, once printed each individual wristband can be removed from the backing liner and either used immediately, distributed via the post or handled as required before being applied to a wrist. Each box contains 1,000 wristbands (100 A4 sheets).

### Product Schematic

Our 10up laser guaranteed wristbands are supplied on an A4 carrier sheet ready for personalisation. The wristbands are pre-printed in a comprehensive range of stock colours - white, green, yellow, orange, red, Pink & blue.

Highly visible tamper evidence which is activated when the wristband is removed. The wristband cannot be re-applied without this being apparent.

Weather resistant polyester is hard wearing and pliable. Its lightweight nature makes it a comfortable and easy to wear wristband.

When gently removed from the carrier sheet, the wristband is completely dry - the adhesive and voiding areas are protected by a removable strip.

Example of laser print. This can be in colour or mono and with variable or static data, 2D coding and graphic imagery.

♻️ These wristbands are recyclable
